Product ID: SDSBSET001 - Armeg 1000V VDE Torque Screwdriver

Armeg SDSBSET001 Adjustable Torque Screwdriver

Regulation BS7671:2008 states that 'electrical equipment shall be installed in accordance with the instructions provided by the manufacturer of the equipment'.

To adhere to this regulation, professional electricians must ensure that during the installation process, mains and individual MCB & RCD connections are tightened to the required torque recommended by the manufacturer.

The Interchangeable 1000V VDE Adjustable Torque Screwdriver, which conforms to EN ISO 6789:2003, is perfect for tightening to an installations required torque.

1-6Nm Adjustable Torque Feature

The wide torque range provides increased versatility for different manufacturers requirements.
Designed to +/- 6% tolerance for accuracy of torque settings.

User Friendly

Distinctive white markings and audible clicking sounds allow users to quickly identify and adjust torque levels.

Blade Auto-lock and Retention Design

Interchangeable Switch-Blades simply click into the handle whilst the quick-release twist mechanism allows them to be quickly and simply removed.

The VDE Torque Screwdriver handle is only available in the 5 Piece Switch-Blade set, which is supplied in a durable and stylish carry case. Protective foam inserts include spaces for you to build your own bespoke Switch-Blade set from the interchangeable range - simply top up from the range as required.
